**III INTERNATIONAL SYMPOSIUM**  
**"Fundamental aspects of rare-earth elements**  
**exploration, mining and separation and modern**  
**materials engineering" (REE-2016)**  
Almaty, Republic of Kazakhstan  
15-18 August 2016

REE-2016 provides a high quality of professional presentations to scientists and engineers who wish to promote and communicate the interaction between technical advances in the field of rare and rare earth elements mining, modification, separation, research, and application.

The goal is to bring researchers and practitioners together to share the latest knowledge on rare and rare earth elements technologies.

***Major Topics***

- Problems of exploration, production and extraction of rare and rare-earth elements
  - Methods and approaches to the separation and isolation of highly pure and rare earth elements
  - Industrial technology of production and separation of rare and rare earth elements
  - Economic aspects of technologies
  - Materials based on rare and rare earth elements (application in metallurgy, catalysis, medicine, optoelectronics, etc.)
  - Trace elements based on rare and rare earth metals in agricultural biotechnology
- Round-table meetings will be held during Symposium

**REE-2016 language: English, Russian**

***Venue:***

**ALTYN KARGALY HOTEL**
