and Pedagogical Design in
Digital Environments»

About NUST MISIS

NUST MISIS is one of the most dynamically developing research & education centres in Russia, attracting talented entrants and hiring leading scientists and advanced lecturers. Our University attaches special significance to the integration of science, education and innovations, as well as the establishment of a creative ecoenvironment bringing together the capabilities of each student.

By implementing the integrated development strategy NUST MISIS has achieved impressive results in all areas of its engagement, namely research, educational and extra-curricular activities. Several large-scale research projects have been launched at the University. We can be proud of a significant quantitative and qualitative growth of the number of scientific papers by NUST MISIS researchers. The University has accomplished several large infrastructure projects including the establishment of several highly innovative research laboratories and the Centre for Industrial Prototyping of High Complexity, as well as the reconstruction of the Commune House campus.

About Program

Master's Program "Second Language Teaching and Pedagogical Design in Digital Environments" at NUST MISIS prepares future teachers of languages for the challenges of the 21st century classroom where adaptive training and simulation environments, MOOCs, blended learning, flipped classroom and other innovations in education are reinforcing traditional learning.

In 2019 we are launching a unique international Master's Program "Second Language Teaching and Pedagogical Design in Digital Environments". Non-native or native, if you are willing to teach either Russian or English as a foreign language, you are welcome to apply!

Master's Program embraces a tailored range of disciplines including:

- Methods and Techniques for Language Teaching
- Graphic Design and Media Production for Teachers
- Gamification and Game-Based Learning
- Assessment Methods and Design
- E-learning Ecologies
- Special Education.

Applicants pre-select their teaching major (Russian or English). Based on their choice, some courses are taught in Russian or English as a medium of instruction:

- Course Design in Digital Environments
- Language Awareness Course
- Language Structure
- Text Theory.

Upon successful completion of the Program, graduates will:

- become aware of the current trends and future prospects in global education
- gain an insight into how educational businesses and institutions operate
- be able to apply digital tools and design educational materials in a learner-centred environment
- be prepared to launch a successful career in language teaching and educational consulting for digital environments.

Admission Requirements

- Individual interview
- B2-Level + in English (CEFR) - for all applicants
- B1-Level + in Russian (CEFR) - for applicants who opt for Russian as pre-selected teaching major.

Are you eager to teach Russian and your language level is below the requirements? We offer an alternative track with an additional intensive Russian language module designed for our Program's students.
