4th INTERNATIONAL SCHOOL OF STUDENT SCIENTIFIC SOCIETIES (SSS)

"STUDENT SCIENTIFIC SOCIETIES ARE A PRIORITY – FROM INITIATIVES TO RESULTS"

Dear colleagues!

Student Scientific Societies (SSS) is a public association of students focused on scientific research and scientific educational activities.

We invite **heads, student leaders and coordinators of student organizations in the field of science** from universities in foreign countries to take part in the **discussion «The best practices of student organization work in science: reports from students of Russian and international universities»** within the framework of the 4th International School of Student Scientific Societies. This discussion will be held on September 10, 2025 in Moscow at the Lomonosov Moscow State University in an online format.

This is a unique opportunity to immerse yourself in the atmosphere of international scientific dialogue, where each participant will be able to contribute to the development of the global educational space. During the event, you will be able to present the brightest and most promising projects of your student scientific society to a wide international audience.

Professional experts and your colleagues will share valuable experience, give important recommendations on the development of scientific initiatives and help you find new ways to solve current research problems. Your participation will open the doors to the world of international scientific cooperation and establish long-term professional ties.

The deadline for registration is September 5, 2025, and can be accessed through the following link: <https://forms.yandex.ru/u/689b2499f47e7313c470ef8b>.

If you have any questions, please contact us by e-mail: sno.msu@yandex.ru.

News about the 4th International SSS School is posted on the social networks of the MSU Student Scientific Society: https://t.me/sno_msu

The event is held as part of a subsidy from the federal budget to educational organizations of higher education for the implementation of activities aimed at supporting student scientific communities.

We are preparing for the new academic year from MSU Student Scientific Society!

The school has become an excellent opportunity for leaders to gain new knowledge, as well as establish contacts with colleagues from different universities in Russia and other countries.
